

# CEP 816-Evernote Assignment

<i>CLIPS</i>	<i>TAGS</i>
<p><b>Learning Registry:</b> I feel as though this clip is important to share because I feel that the LR is a great tool for any teacher that is looking for great lessons to use without having to reinvent the wheel or for that very creative teacher to share their ideas. Also, I love how the LR is not just from a single site and that it pulls information from other sites to better meet your needs.</p>	<p>NEW IDEA DISCOVERABILITY INDIVIDUALIZED INSTRUCTION SHARING IDEAS NONLINEAR</p>
<p><b>Open Educational Resources:</b> This clip I want to share as well because of the way that this source allows an easier approach to individualized instruction; which is the current best practices in education. A great site that I clipped was (OERCOMMONS.ORG)</p>	<p>NEW IDEA INDIVIDUALIZED INSTRUCTION NONLINEAR</p>
<p><b>Digital Learning Test:</b> I clipped this new idea because I was so intrigued with this idea of testing students on their efficiency in the area of technology. With the changing of almost everything to the digital world I feel that this assessment on technological knowledge is a great way for a teacher to see what their student's knowledge is and what strengths they can benefit from.</p>	<p>NEW IDEA TECHNOLOGY OF THE FUTURE BOOKS ON WEB</p>
<p><b>Bloggng:</b> The idea of using a Blog in my teaching career never crossed my mind until I was brought to the benefits of them. By using a Blog to help your students with reminders of due dates, and the way a Blog can be used to keep parents involved is also great.</p>	<p>NEW IDEA PARENT INVOLVEMENT TECHNOLOGY OF THE FUTURE ONLINE LEARNING ENVIRONMENT</p>
<p><b>WIKI:</b> I clipped this idea of using a WIKI in my class because of the element of using it for student collaborative learning. In my class my students do book studies and the WIKI is a great for them to have an online chat about what the book is about and any also to share:</p>	<p>NEW IDEA COLLABORATION BOOK STUDY TECHNOLOGY OF THE FUTURE ONLINE LEARNING ENVIRONMENT FIGHTING FEAR OF TECHNOLOGY</p>

<p>questions, inferences, predictions, new ideas, connection and any other comprehension ideas that they may have. This idea does scare me a little with allowing students to manipulate the WIKI, but that is one step I need to work on is trusting technology and fighting my fear of technology.</p>	
<p><b>Diigo:</b> I chose to clip Diigo because of the great things that this site can do. My students have to use specific sites for Reading and Math during their computer center and some of my students have a hard time remembering the names of the sites and Diigo is a great way to help those students. By setting up a bookmark system for the sites they are required to use will deviate some anxiety and fear of technology that my students have.</p>	<p>NEW IDEA TECHNOLOGY OF THE FUTURE ONLINE LEARNING ENVIRONMENT ORGANIZATION FIGHTING FEAR OF TECHNOLOGY COMPUTER CENTER</p>
<p><b>Flickr:</b> I clipped the information on Flickr because I take a lot of pictures in my classroom and post them on our class website and with this awesome site I can take those pictures and post them in a way that can be used by others. We do a lot of pictures in our Science Inquiry and by posting those pictures someone might be able to use what we have done to show others new ideas.</p>	<p>NEW IDEA PARENT INVOLVEMENT TECHNOLOGY OF THE FUTURE ONLINE LEARNING ENVIRONMENT PICTURES RESEARCH COLLABORATION</p>
<p><b>Video Publishing for Teachers:</b> I clipped this information because our 3<sup>rd</sup> grade team does a lot with videos. We record our students to show their increase in fluency and also record their Science experiments so they can go back on their own time and revisit their learning. I was intrigued on the different avenues that I can take to publish our efforts.</p>	<p>NEW IDEA TECHNOLOGY OF THE FUTURE ONLINE LEARNING ENVIRONMENT PARENT INVOLVEMENT SCIENCE FLUENCY READING VIDEOS</p>
<p><b>Ning:</b> When reading about Ning and how it works as a create your own Facebook type site; I was very interested in learning more about it. I would love to use Facebook for my class and create</p>	<p>NEW IDEA TECHNOLOGY OF FUTURE ONLINE LEARNING ENVIRONMENT NONLINEAR COLLABORATION</p>

<p>groups but my district frowns upon that. Ning is a great way to create the same experience but in a more controlled environment.</p>	<p>SOCIAL NETWORKING</p>
<p><b>“If we fail to graduate students who are not asked to create, sustain, and participate in these networks in a safe, ethical, and effective way; were doing them a disservice.”</b> I chose to clip this quote from Will Richardson because I think that it sums up all that I have learned and has really shown me how much the world is changing in the area of technology and if we do not teach our students how to use technology and to use it in a way that bring success then we are failing them and they will end up with a fear of technology.</p>	<p>NEW IDEA TECHNOLOGY OF THE FUTURE FIGHTING THE FEAR OF TECHNOLOGY QUOTES WILL RICHARDSON</p>
